

HDR caustics

Welcome to

HDR caustics

This is a collection of 24 High Dynamic Range caustic light sources.

The images are provided in high res HDR format and optimised for use in 3D applications supporting textured light sources.

Especially useful for creating hyper realism with exaggerated caustics, fake caustics (using gobos) on e.g. interiors, and volumetric light rays.

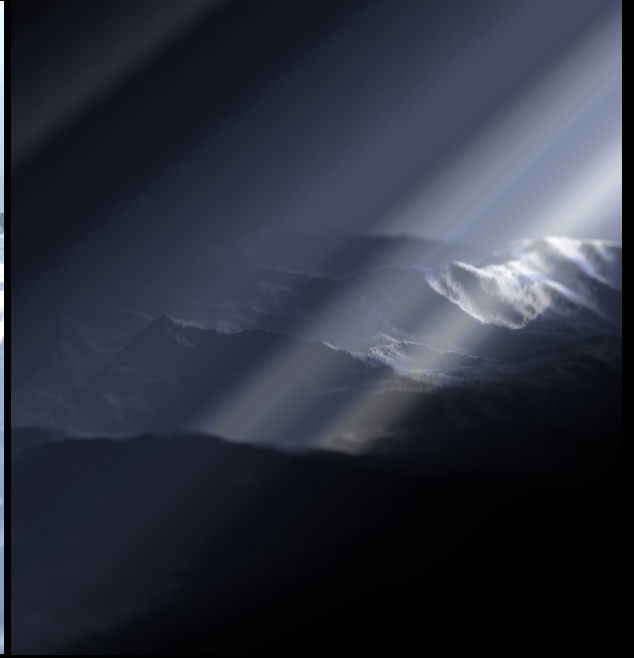

The original colors of the lights have been retained.
- Desaturate in Photoshop (or similar) for neutral light.
