Leather Textures

This collection contains 26 different leather texture sets. We carefully chose a wide range of types and styles of leather commonly used for furniture and interior decoration. Apart from a plethora of standard leathers, there are also various vintage and rustic leathers, leathers with special coatings and treatments, suede and split leathers, as well as a number of exotic leathers.

Custom Color Templates

Although we tried to create a balanced color palette for every leather, you of course might need or want a particular leather in a particular color. For this purpose we have included easy to use template files for *Adobe Photoshop*™ that allow you to quickly create custom diffuse maps for any leather and in any color.

Materials

Users of NextLimit's *MaxwellRender*™ will find a total of 722 ready-to-use material setups in .mxm format (for version 3.1 and up).
